

Divisional of 10/164,460

VII/18DV

In the Claims

1. (Canceled) An assembly comprising:
  - (A) elongate columns each having a first end and a second end;
  - (B) a translating section disposed between the elongate columns generally equidistant between the first and second ends and interconnected to the elongate columns; and
  - (C) a flexure interconnecting each elongate column to the translating section.
2. (Canceled) The assembly of claim 1, wherein the elongate columns are essentially parallel to one another.
3. (Canceled) The assembly of claim 1, further comprising a carriage that moves in the X-Y coordinate plane and reduces movement of the translating section in the Z direction.
4. (Canceled) The assembly of claim 3, wherein the Z direction is perpendicular to the X-Y coordinate plane.
5. (Canceled) The assembly of claim 3, wherein the carriage is substantially symmetrical.
6. (Canceled) The assembly of claim 1, further comprising a rigid frame that supports the carriage.
